Find doctors and hospitals

Find a doctor

Selecting a provider is easier when you know that they've been thoroughly vetted. That's why we carefully review independent performance and quality data before admitting any provider into our network.

Providers

Doctors, hospitals, medical equipment, and specialty services

Search for a participating provider by name, location, specialty, or medical procedure.¹

Your state and national plan names are listed on your health insurance ID card. If you need help finding your plan, please call your insurance plan's customer service department.

Using doctors and hospitals in your plan's network helps keep your costs down. If you visit a doctor or hospital that is not part of your plan's network, your plan may not cover your care or your out-of-pocket costs could be much higher. To ensure that the health care provider you select is included in your plan's network, it's best to search using your current plan. You can select your current plan by entering the name of your plan in the "Search by name of plan" field or by selecting Medical under browse plans and then clicking on the name of your plan. If you are an Independence PPO or EPO member and you are unable to find your doctor, try entering National BlueCard PPO in the Search by name of plan box.

Search by name of plan
